🎓 EDUCATION

Bachelor of Technology (B.Tech) Computer Science & Engineering

Axis Institute of Technology and Management

2025 – 2029 (Expected)

💻 TECHNICAL SKILLS

Languages

C

C++

JavaScript (ES6+)

Python

Frontend & Backend

React

Node.js

FastAPI

HTML5 / CSS3

Tailwind CSS

REST APIs

IoT & Embedded

Arduino

ESP32

Sensors & Actuators

Serial Comms

Tools & Workflow

Git

GitHub

VS Code

Postman

GitHub Pages

★ CORE STRENGTHS

- ✓ Hardware + Web Synergy
- ✓ Rapid Prototyping (0 to 1)
- ✓ Problem Solving & Logic
- ✓ Team Collaboration & Git

👤 PROFESSIONAL PROFILE

Computer Science undergraduate passionate about building impactful technology at the intersection of full-stack web development and IoT hardware integration. Experienced in prototyping end-to-end safety devices for nationwide hackathons (SIH) and architecting responsive web applications with clean, production-ready code.

🔗 TECHNICAL PROJECTS

● Smart Helmet (SIH Project)

HARDWARE + IOT

Arduino/ESP32, Alcohol Sensor, Impact Sensor, C++, GSM/GPS

- Designed an intelligent road safety helmet enforcing rider helmet compliance before vehicle ignition.
- Engineered real-time alcohol detection and automated emergency SOS dispatch with location via GSM/GPS.
- Shortlisted and developed for the prestigious Smart India Hackathon (SIH) prototype showcase.

● ChronoFact Web Platform

WEB APPLICATION

React, Node.js, REST APIs, Modern CSS, GitHub Pages

- Built a curated historical fact-checking and timeline discovery engine with sub-second querying.
- Implemented dynamic timeline visualization and interactive responsive cards for seamless exploration.
- Successfully deployed live on GitHub Pages with clean cross-device mobile responsiveness.

● Smart Kitchen Safety & Automation

FULL-STACK IOT

Python (FastAPI), Arduino, Gas & Flame Sensors, Web Telemetry

- Engineered an IoT hazard prevention system featuring MQ-2 gas leakage and flame detection.
- Integrated Python FastAPI backend reading serial telemetry to drive automatic exhaust relay safety actions.
- Designed an interactive live status dashboard providing real-time visual telemetry and alerts.

● Personal Developer Architecture

FRONTEND ARCHITECTURE

Semantic HTML5, Vanilla JavaScript, Web Audio API, Modern CSS

- Crafted an Awwwards-inspired portfolio with synthesizer-driven acoustic audio feedback and custom cursor.
- Integrated Formspree serverless email handling with zero page refreshes and asynchronous validation.

🏆 HONORS & HIGHLIGHTS

Smart India Hackathon (SIH) Participant

Selected to build hardware-integrated safety innovations under intense competition constraints.

Continuous Problem Solving & DSA

Active learner tackling data structures, algorithmic puzzles, and core CS on LeetCode & GeeksforGeeks.
